HOW TO USE eem

electronic engineers master

1973-74

Need directory information?

EEM contains four complete directories which provide the most up-to-date information available. These directories are listed and described at the right. They appear in all three volumes, with the exception of the Trade Mark Directory which appears only in Volume 1. Directory references to Volume 4 indicate the 1973 edition, which you received in January. That copy of Volume 4 should be retained to complete the 4-volume set.

Add Volume 4/1973 to your copies of Volumes 1, 2 and 3 to make a complete set of **EEM** for 1973-74.

UNITED TECHNICAL PUBLICATIONS

Included in this volume are:

The Product Index and Directory

The Product Index and Directory (green section, page 9) lists more than 6,000 types of electronic products alphabetically, by product. Under each product heading is a complete, alphabetical listing of manufacturers who make that product. **Bold face** listings indicate which manufacturers have provided catalog data on that product in the white pages.

The Manufacturers and Sales Office Directory

The Manufacturers and Sales Office Directory (starts yellow section of each volume) lists more than 3,000 manufacturers of electronic components, materials, instruments, assemblies, systems, and key services. Provided are complete addresses, phone numbers, sales managers' names, names of application engineers, TWX numbers where applicable, selected distributors. **Bold face** listings indicate that manufacturers have provided catalog data in the white pages and that sales offices are listed.

The Distributor Directory

The Distributor Directory (yellow section, page 1594, with black edge marking) lists more than 1,000 electronic distributors and branch locations, alphabetically by distributor's name, geographically by state and city.

Need catalog information?

For complete catalog information on any product, refer to the Product Index and Directory (green section, page 9, all volumes) which provides a complete listing of all the manufacturers who supply a particular product. Those manufacturers listed in bold face with page and volume number references have provided catalog data on this product in the catalog section (white pages) where you can find the information you need. References to Volume 4 indicate the Volume 4 you received in January and which should be retained to complete your 4-volume set of EEM.

Need additional information in a hurry?

Two special telephone services are being maintained for EEM users to provide extra information you need. If you need to determine a local source of supply, just **D.I.A.L. EEM.** This toll-free service (**D**istributor **I**nformation **A**nd **L**istings), provides you with the name of a sales office or distributor in your area who can provide a needed product.
For up-to-the-minute listings of manufacturers who provide certain IC functions, **call the IC UPDATE HOTLINE.** Listings of IC functions are updated daily by manufacturers throughout the country. For information in a hurry, **just D.I.A.L. EEM** — call toll-free 800-645-9200 (in N. Y. State call collect (516) 294-0990). Or **call The IC UPDATE HOTLINE,** Dial toll-free 800-645-9201.

Need additional assistance?

Contact the EEM editorial staff, at United Technical Publications, Inc., 645 Stewart Avenue, Garden City, N. Y. 11530, or phone (516) 248-9700.

introduction

The 1973-74 edition of EEM, Volumes 1, 2 and 3, is designed to integrate with Volume 4/'73, published in January 1973. The complete 4-volume set is the largest, most comprehensive edition of EEM ever published, providing catalog data in four separate volumes, all fully cross-referenced:

Volume 1 — Test Instruments / Equipment and Systems

Volume 2 — Active Components / Circuit Assemblies Controls and Drives / Filters

Volume 3 — Passive Components / Materials / Hardware

Volume 4 (1973) — All product categories included in Volumes 1, 2, and 3

The 53 EEM product sections have been individually assigned to their appropriate volume. Product categories within each volume are listed on the cover. A complete listing of the 53 Product Sections appears on page 3 and on the second page of the catalog section in each volume. This listing indicates in which volumes, and on which pages, specific products can be located.

The eem System

United Technical Publications' Time-Saving Product Information System

Designed to provide a complete answer to your need for electronic product information:

- **eem / Electronic Engineers Master**
  Two complete editions each year.
- **D.I.A.L. eem Toll-Free Phone Service**
  Special toll-free phone service through which local source data for electronic products are instantly available.
- **IC Update Hotline**
  Toll-free phone service to provide daily updating of IC functions available from each manufacturer.
- **Semiannual Product Postcard Mailers**
  Providing additional and updated product data between editions of EEM.
- **Electronic Distributors Master Catalog Program**
  Comprehensive quarterly catalog program for distributors.

Prices

Prices are furnished for information only — they are not offered as quotations. Participating manufacturers reserve the right to change specifications, revise prices or discontinue items without notice. While every precaution has been taken to assure accuracy in content, the publisher cannot be responsible for manufacturers' claims and representations; nor can any guarantee be made against the possibility of error or omission.

Circulation Policy

eem / Electronic Engineers Master is distributed semi-annually at no charge to qualified engineers and purchasing agents, affiliated with North American manufacturers, research laboratories and government agencies. To qualify for a subscription you must be actively engaged in application, selection, specification, design or procurement of electronic components, materials, equipment and related fabrication services.

Official subscription form may be obtained by submitting the following on your company's letterhead: (1) name and title, (2) job function and duties, (3) main products manufactured or developed by your company, division or laboratory. Please include building number or mail station with address. Letters must be signed personally. Group qualification is not acceptable. The cost of **eem** to nonqualified personnel is $20.00 per copy.

No portion of this book may be reproduced without express permission of the publishers.
Library of Congress Catalog Card Number 58-9813.

53 product sections in 4 volumes

Vol.1 TEST INSTRUMENTS EQUIPMENT & SYSTEMS

Vol.2 ACTIVE COMPONENTS CIRCUIT ASSEMBLIES / FILTERS CONTROLS & DRIVES

Vol.3 PASSIVE COMPONENTS MATERIALS / HARDWARE

Vol.4 COMBINES PRODUCT CATEGORIES INCLUDED IN VOLS. 1, 2, AND 3

eem — Electronic Engineers Master saves you engineering, specifying and purchasing time. Manufacturers' catalogs are grouped under easy-to-remember headings.

The 53 Product Sections categorize related electronic components, equipment, materials, instruments and systems, and fabrication services, enabling you to quickly compare and evaluate similar items.

To find a specific manufacturer's catalog pages refer to the Index of Manufacturers which appears in two places in this volume, at the beginning of the green section and at the beginning of the white section.

Product Section	Volumes 1, 2, 3 Page	1973 Volume 4 Page	Products
1100	Vol.2•303	Vol.4•309	Amplifiers, Audio, Operational, etc.

Product Index and Directory

The Product Index and Directory is designed to help you locate manufacturers of specific types of electronic products. Products are listed alphabetically, with many helpful cross references. This index has been completely revised and updated since the last edition of EEM Many product headings have been changed; many have been added, in an effort to keep the directory current with changing technology. Review it thoroughly for complete information.

Under each product heading there is a complete alphabetical listing of manufacturers who make that product. The first portion of the listing, in **bold face** with volume and page numbers indicated, consist of those manufacturers who have provided catalog data on this specific product in the white pages of EEM. The second part of the listing includes those manufacturers who make this product but have not provided catalog data on it in EEM. **Bold face** names in this portion of the list indicate manufacturers who have catalog pages in EEM but which do not include information about this specific product.

eem
electronic engineers master
1973-74

This directory was completely revised and updated for this edition prior to publication. Thus the information is current as of Spring 1973.
This same index appears in all three volumes of EEM.

Abrasive Belts, Compounds, Cords, Powders, etc.

Carborundum Co., Niagara Falls, N.Y.
Communications Technology Corp., Los Angeles, Cal.
Cratex Rubberized Abrasives, Burlingame, Calif.
Engis Corp., Morton Grove, Ill.
Norton Coated Abrasive & Tape Divs., Troy, N.Y.
3M Co., St. Paul, Minn.
Union Carbide, San Diego, Cal.

Absorbers, Shock—See Mounts, Shock & Vibration

Accelerators & Accessories, Particle

High Voltage Engrg. Corp., Burlington, Mass.
Kaman Sciences Corp., Colorado Springs, Colo.
Maxwell Labs., Inc., San Diego, Calif.
Radiation Dynamics, Inc., Westbury, N.Y.
Trio-Tech, Inc. of Calif., Burbank, Calif.
Varian Assocs., Palo Alto, Cal.

Accelerometers

Unholtz-Dickie Corp., Hamden, Conn. Vol 1•530
Advanced Dynamic Instrs. Div., Alexandria, Va.
B & K Instrs., Inc., Cleveland, Ohio
Bell & Howell Co., Pasadena, Calif.
